## **DETAILED ACTION**

1. The disclosure is objected to because the parent application 09/584,548 has been abandoned, it status should be accordingly updated in the specification.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Takamuki (6,021,420).

Takamuki discloses in figure 2 a transposition circuit for transposing NxN matrix having N memory units (22), N first selectors (21), N second selectors (24), and a control unit (25) as claimed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2193
